

Jhansi Sagarapu

Python Backend Developer

Email: s.jhansi1996@gmail.com | Phone: +91 8106063398

LinkedIn: linkedin.com/in/sagarapu-jhansi

Professional Summary

Python Backend Developer with 5 years of experience in designing and developing scalable APIs, data-driven applications, and backend systems. Strong foundation in object-oriented programming, Python scripting, REST services, and database integration. Experienced in FastAPI/Django frameworks, SQL data handling, debugging, and Agile development. Comfortable working across backend, data processing, and frontend integration layers in cloud-enabled environments.

Technical Skills

Python & OOP

- 1 OOP Concepts: Classes, Objects, Functions, Decorators
- 2 Python scripting, Lambda functions
- 3 Data serialization using JSON (REST APIs) and BSON (MongoDB)
- 4 Debugging using PyCharm, VS Code, Jupyter

Data Structures & Concepts

- 1 Lists, Tuples, Sets, Dictionaries
- 2 Time Complexity basics and performance-aware coding
- 3 Data manipulation using Pandas and NumPy

Backend & APIs

- 1 FastAPI, Django
- 2 REST API design & implementation
- 3 HTTP methods, status codes, authentication
- 4 Request validation, pagination, error handling

Databases

- 1 PostgreSQL, MySQL, MongoDB
- 2 SQL queries, joins, indexing, optimization
- 3 Data extraction and analysis using SQL

Frontend (Working Knowledge)

- 1 Fundamentals of Vue.js
- 2 Basic understanding of React.js

- 3 Experience integrating frontend with REST APIs

DevOps & Tools

- 1 Git, GitHub
- 2 CI/CD pipelines (GitHub Actions)
- 3 Docker containerization
- 4 Basic cloud knowledge (AWS Lambda)

Methodologies

- 1 Agile / Scrum
- 2 Cross-team collaboration & stakeholder communication

Professional Experience

Backend Python Developer – Telus Digital (Jul 2022 – Present)

- 1 Designed and developed REST APIs using FastAPI and Django for backend services
- 2 Built data-driven backend workflows using Python scripting and OOP principles
- 3 Integrated APIs with PostgreSQL, MySQL, and MongoDB ensuring optimized queries and indexing
- 4 Implemented pagination, validation, and structured error handling in API design
- 5 Worked with JSON-based request/response handling in REST APIs and BSON data storage in MongoDB
- 6 Used Pandas and NumPy for processing and validating structured data
- 7 Debugged and optimized performance using PyCharm and VS Code
- 8 Containerized applications using Docker and deployed via CI/CD pipelines
- 9 Collaborated with frontend teams for API integration
- 10 Worked in Agile sprints including stand-ups, sprint planning, and code reviews

Python Developer – Infosys Limited (May 2018 – Nov 2019)

- 1 Developed backend modules using Python for enterprise onboarding systems
- 2 Built and maintained REST APIs supporting internal workflows
- 3 Managed relational data using MySQL and wrote optimized SQL queries
- 4 Followed OOP principles and modular coding practices
- 5 Used Git for version control and collaborative development
- 6 Worked in Agile-based project environments

Education

B.E. Electrical & Electronics Engineering

Anil Neerukonda Institute of Technology and Sciences | CGPA: 8.2
